

MOHAN S

B.Tech – Artificial Intelligence and Machine Learning

+91 73973 18722 | mohansithaiya@gmail.com

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Professional Summary

B.Tech student specializing in Artificial Intelligence and Machine Learning with hands-on experience in Python, Java, JavaScript, Django, SQL, machine learning, and web development. Experienced in developing AI-powered applications, full-stack platforms, computer vision solutions, and data-processing workflows. Strong foundation in Data Structures, Object-Oriented Programming, DBMS, Git, and software development with a focus on building practical, user-oriented solutions.

Education

Saveetha Engineering College

Chennai, Tamil Nadu

B.Tech in Artificial Intelligence and Machine Learning

2023 – 2027

CGPA: 7.94 / 10

Technical Skills

Languages: Python, Java, C, JavaScript, SQL | **Web:** HTML, CSS, Bootstrap, Django, Flask, REST APIs

AI/ML: Machine Learning, Computer Vision, OCR, OpenCV, NumPy, Pandas, Matplotlib | **Tools:** Git, GitHub, VS Code, Linux, Jupyter Notebook

Core: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Development

Projects

NAMMANADU – AI-Powered Civic Assistance Platform

Python, Django, AI, React, JavaScript

- Developed an AI-powered civic assistance platform for Tamil Nadu citizens, integrating **4+ core workflows** for service discovery, complaint creation, tracking, and resolution.
- Designed an AI-assisted complaint generation workflow that converts user-provided issues into structured and actionable complaint descriptions, reducing manual drafting effort.
- Implemented **role-based dashboards** and complaint status workflows to support citizen and administrative interactions through a centralized platform.

InferChain – Verifiable AI Inference Platform

AI, Blockchain, Python, APIs, Workflow Automation

- Developed a platform for **secure and verifiable AI inference workflows**, combining AI processing with blockchain-based verification.
- Designed a request-validation workflow covering **3 key stages**: request submission, inference processing, and verification of inference results.
- Implemented workflow automation and validation mechanisms to improve transparency, traceability, and trust in AI-generated inference outputs.

Smart Grocery Expiry Prediction & Alert System

Python, Machine Learning, OCR, OpenCV, Pandas

- Developed an OCR-based grocery management system to extract product and expiry information from images and organize it for automated monitoring.
- Integrated **2 computer-vision components**, OCR and OpenCV, to process grocery labels and extract relevant information from product images.
- Built a data-processing workflow using Python and Pandas to transform extracted information into structured datasets and support expiry prediction and alert generation.

Experience

Zybeak Technologies Pvt. Ltd.

Chennai, Tamil Nadu

Cybersecurity & Ethical Hacking Intern

Jan 2025

- Performed vulnerability assessment and security analysis on systems and web applications using cybersecurity tools, assisting with penetration-testing and troubleshooting activities.

Certifications

AWS Skill Builder: Cloud Foundations | **JPMorgan Chase & Co. (Forage):** Software Engineering Job Simulation

University of Michigan: Django for Everybody | **IBM:** Introduction to Machine Learning, Regression & Classification, Prompt Engineering

University of Colorado Boulder: Database Management Essentials | **Great Learning:** Python Fundamentals

Achievements

Finalist: Yukthi CTF 2025 | **Finalist:** DEFY 2026, VIT | **Hackathons:** Smart India Hackathon, IBM Datathon, IIT Madras & VIT Hackathons
